## Risk Factors

This document is a financial promotion for the Stewart Investors Worldwide Leaders Sustainability Fund in the UK and elsewhere where lawful. Investing involves certain risks including:

- **The value of investments and any income from them may go down as well as up and are not guaranteed. Investors may get back significantly less than the original amount invested.**
- **Emerging market risk:** Emerging markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.
- **Currency risk:** The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.
- **Concentration risk:** The Fund invests in a relatively small number of companies which may be riskier than a Fund that invests in a large number of companies.

Reference to specific securities (if any) is included for the purpose of illustration only and should not be construed as a recommendation to buy or sell. Reference to the names of any company is merely to explain the investment strategy and should not be construed as investment advice or a recommendation to invest in any of those companies.

For a full description of the terms of investment and the risks please see the Prospectus and Key Investor Information Document.

**If you are in any doubt as to the suitability of our funds for your investment needs, please seek investment advice.**

**If you are unsure of the terminology used in this report, please seek independent financial advice.**

# Stewart Investors Worldwide Leaders Sustainability Fund

## Portfolio Overview

31 December 2023

### Investment Philosophy

Our investment approach founded in 1988 is based on:

- Stewardship
- An absolute return mindset<sup>♦</sup>
- Bottom-up analysis<sup>▪</sup>
- Long-term thinking
- Searching for quality companies
- Finding sustainable and predictable growth
- Strong valuation disciplines

### Investment objective and policy

The Fund aims to achieve capital growth over the long term (at least five years).

The Fund mainly invests in shares of large and mid-sized companies around the world and that are listed on exchanges worldwide. These companies generally have a total stock market value of at least US\$5 billion. The Fund may invest in both developed and emerging market countries. Emerging markets are countries that are progressing toward becoming advanced, usually shown by some development in financial markets, the existence of some form of stock exchange and a regulatory body. The Fund may invest in any industry. The Fund invests in shares of high quality companies which are positioned to contribute to, and benefit from, sustainable development.

Investment decisions around high quality companies are based on three key points: (i) Quality of management. (ii) Quality of the company including its social usefulness, their environmental impacts and efficiency and responsible business practices. (iii) Quality of the company's finances and their financial performance.

Sustainability is a key part of the approach. The Fund may invest up to 10% in other funds. The Fund will only use derivatives to reduce risk or to manage the Fund more efficiently in limited cases.

### Fund Information

Fund Launch Date	30 July 1999
Fund Size (£m)	43.3
UK's Investment Association Sector	Global
Benchmark	MSCI AC World Net Index*
Number Of Holdings	39
