INVESTMENT OBJECTIVE AND POLICIES

Investment Objective

To provide a total return greater than the FTSE World Government Bond Index ("WGBI").

Investment Policy

The Fund invests primarily (at least 70% of its Net Asset Value) in debt securities of governments or quasi-government organization issuers and/or issuers from countries organised, headquartered or having their primary business operations in the WGBI Index, although in the event of unusual market conditions, investments in countries not included in the WGBI Index may be included and may constitute up to 50% of the Net Asset Value of the Fund.

No more than 10% of the Fund's Net Asset Value will be invested in any country outside of the United States, the European Union, the United Kingdom, Switzerland, Australia, Canada, New Zealand, Japan or Norway and less than 30% of the Fund's Net Asset Value in aggregate will be invested outside these countries. The Fund will hold securities of issuers from at least three countries.

The Fund will normally invest at least 70% of its Net Asset Value in investment grade debt securities (rated as Baa3 or above by Moody's Investor Services, Inc or BBB- or above by Standard & Poor's Corporation, or other recognised rating agencies), or, if unrated, of comparable quality as determined by the Investment Manager. The Fund is not constrained as to the maximum maturity of its portfolio securities. The Fund may hold less than 30% of its Net Asset Value in debt securities rated below investment grade or if unrated, of comparable quality as determined by the Investment Manager. The Fund's investment in debt securities may include securities with loss-absorption features (including contingent convertible debt securities, senior non-preferred debt, instruments issued under the resolution regime for financial institutions and other capital instruments issued by banks or other financial institutions) which will be less than 30% of the Fund's Net Asset Value.

The Fund is not subject to any limitation on the portion of its Net Asset Value that may be invested in debt securities in any sector.

Although the Fund has a global investment universe, the securities selected for investment based on the Investment Manager's approach may at times result in a portfolio that is concentrated in certain geographical area(s).

The Fund may invest less than 30% of its Net Asset Value in onshore debt securities in the PRC via Bond Connect.

The Fund will not invest more than 10% of its Net Asset Value in debt securities issued by and/or guaranteed by a single sovereign issuer which is below investment grade.

The Fund may only use FDIs for efficient portfolio management purposes (i.e., to reduce risk or costs, hedge or to generate additional capital and income) by entering into futures, options, swaps, and forwards, in each case in respect of currencies and bonds, with a level of risk that is consistent with the risk profile of the Fund. It is not intended that the Fund will avail of the opportunity to invest in FDIs for investment purposes.

Benchmark Information

As noted above, the Fund's investment objective is to provide a total return greater than WGBI. The Fund is actively managed meaning that the Investment Manager uses its expertise to pick investments rather than tracking the allocation and therefore the performance of the benchmark. The Fund's performance is compared against the value of WGBI.

The benchmark is not used to limit or constrain how the Fund's portfolio is constructed, although there are certain limits which apply as set out in the investment policy of the Fund above. The benchmark is part of a target set for the Fund's performance to match or exceed and may also be used to compare

the Fund's performance. A majority of the Fund's assets could be components of the benchmark. The Investment Manager has discretion within the Fund's investment policy to invest away from the benchmark requirements, and without regard to the weighting of benchmark assets, in order to take advantage of specific investment opportunities.

WGBI is broad index providing exposure to the global sovereign fixed income market. The index measures the performance of fixed-rate, local currency, investment-grade sovereign bonds. It comprises sovereign debt from over 20 countries, denominated in a variety of currencies.

The Fund's leverage exposure is expected to be medium, as described in the Prospectus.

SFDR

The Fund is classified under SFDR as being subject to Article 6. Disclosures regarding the manner in which Sustainability Risks are integrated into investment decisions and the results of the assessment of the likely impacts of Sustainability Risks on the returns of Fund are set out in the Prospectus.

FUND SPECIFIC RISKS

There can be no assurance that the Fund's investments will be successful or that the investment objective of the Fund will be achieved. Investors should be aware of the risks indicated below and described in the **Risk Factors** section of the Prospectus. An investment in the Fund is suitable only for persons who are in a position to take such risks.
