Our funds
FSSA Greater China Growth Fund

The fund aims to achieve capital growth over the medium to long term (at least three years).

The fund's investment strategy is centred on identifying quality companies in the Peoples Republic of China, Hong Kong and Taiwan, buying them at a sensible price and holding for the medium to long term (at least three years).

The strategy aims for capital preservation; the potential downside of an investment is evaluated as much as the upside. Benchmark indices are not used in the portfolio construction process as they may not fully represent the available opportunities in the markets.

Performance

We have assessed performance considering absolute return, relative return and downside risk for all share classes. Each share class fared well in each of the tests and as a result, the share classes are all rated Green for performance.

Quality of service

In assessing quality of service, we have reviewed the investment proposition of the fund and found that it was run in accordance with the investment team's philosophy and purpose.

We have reviewed proxy voting and corporate engagement and found that the fund adheres to First Sentier Investors' Principles and Policy for Responsible Investment and Stewardship.

We have reviewed our governance functions, and how we oversee fund liquidity, compliance breaches, and complaint handling to ensure that investors receive the appropriate support when needed.

We have also reviewed the information that is available to investors on monthly and quarterly factsheets and found that it provides appropriate information on the characteristics of the fund and share classes. We seek to continuously develop our support to investors and tailor it to their needs.

All share classes are rated Green for quality of service.

Classes of units

All Class A shares have been rated Amber while we review commissions and servicing costs specific to Class A shares.

In November 2020, many shareholders were converted from Class A shares to Class B shares. Those who were not subject to the mandatory conversion were informed of the cheapest share class that they are eligible for, and invited to switch.

Class B shares are rated Green.

AFM costs

We have reviewed the AMC of the primary share class to ensure that it is in line with the value provided through investment returns.

This fund is rated Green for costs because the application of costs between share classes is fair and reasonable and reflects differing levels of service for each class.

Comparable market rates

We have compared the OCF of each share class against a relevant peer group and each share class was above the median so all share classes are rated Amber for comparable market rates.

Comparable services

Based on our assessment, each share class is rated Green for comparable services as the fees charged are comparable to other funds and mandates of the same investment strategy, manager, and similar size.

Economies of scale

The AMC of the Class B shares reflects pricing that is set for the investment strategy as a whole and considers the expected capacity of the strategy.

An OCF cap of 0.25% for additional expenses above the AMC is in place for all share classes to protect from future diseconomies of scale above the cap.

Based on our assessment, all share classes are rated Green for economies of scale.

Overall rating

All share classes are rated Green and are providing value to investors.

The fund has the following share classes:

Share class	Launch date	AUM £	AMC %	OCF %	Overall rating	Performance	Quality of service	Classes of units	AFM costs	Comparable market rates	Comparable services	Economies of scale
