Stewart Investors Indian Subcontinent Sustainability Fund

The fund aims to achieve capital growth over the long term (at least five years).

The fund invests in a diversified portfolio of equity or equity-related securities of companies that are incorporated or listed, or where a majority of their economic activities take place in the Indian subcontinent and which are listed, traded or dealt in on regulated markets worldwide. The fund invests in companies that are positioned to benefit from, and contribute to, the sustainable development of the countries in which they operate.

The manager invests with capital preservation in mind, meaning it defines risk as losing client money, rather than deviation from a benchmark index. The manager's focus on quality companies rather than investing according to a benchmark index may lag in very strong liquidity-driven or momentum-led markets and may perform well when due recognition is given to companies with quality management teams, good long-term growth prospects and sound balance sheets.

The fund has the following share classes:

Performance

We have assessed performance considering absolute return, relative return and downside risk for each share class.

Each share class is rated Green for performance.

Quality of service

In assessing quality of service, we have reviewed the investment proposition of the fund and found that it was run in accordance with the investment team's philosophy and purpose.

We have reviewed proxy voting and corporate engagement and found that the fund adheres to First Sentier Investors' Principles and Policy for Responsible Investment and Stewardship.

We have reviewed our governance functions, and how we oversee fund liquidity, compliance breaches and complaint handling to ensure that investors receive appropriate support when needed.

We have also reviewed the information that is available to investors on monthly and quarterly factsheets and found that it provides appropriate information on the characteristics of the fund.

All share classes are rated Green for quality of service.

Classes of units

All Class A shares have been rated Amber while we review commissions and servicing costs specific to Class A shares.

In November 2020, many shareholders were converted from Class A shares to Class B shares. Those who were not subject to the mandatory conversion were informed of the cheapest share class that they are eligible for, and invited to switch.

Class B shares are rated Green.

AFM costs

We have reviewed the AMC of the primary share class to ensure that it is in line with the value provided through investment returns.

Each share class is rated Green for costs because the application of costs between share classes is fair and reasonable and reflects differing levels of service for each class.

Comparable market rates

We have compared the OCF of each share class, where an equivalent type of share class is observable, against a relevant peer group. The Class B (Acc) EUR shares have an OCF above the median so this share class is rated Amber for comparable market rates. The other Class B shares are rated Green as their OCF is below the sector median.

Comparable services

Based on our assessment, all share classes are rated Green for comparable services as the net fees charged are comparable to other funds and mandates of the same investment strategy and similar size.

Economies of scale

The AMC of the Class B shares reflects pricing that is set for the investment strategy as a whole and considers the expected capacity of the strategy.

Share classes are having economies of scale from third party costs passed on.

Based on our assessment, all share classes are rated Green.

Overall rating

All share classes are rated Green and are providing value to investors.
