The Fund aims to achieve capital growth over the long term (at least five years).

* The benchmark for this Fund has been identified as a means by which investors can compare the performance of the Fund and has been chosen because its constituents most closely represent the scope of the investable assets. The benchmark is not used to limit or constrain how the portfolio is constructed nor is it part of a target set for Fund performance. Given the diverse nature of the constituent funds within the Specialist IA sector the manager does not compare performance of this Fund with its IA sector.

Risk and Reward Profile

◀ Lower Risk
Potentially Lower Rewards

Higher Risk ▶
Potentially Higher Rewards

The synthetic risk reward indicator (the SRRRI) rating is not a measure of the risk of you losing your investment but describes how much the value of the Fund went up and down in the past.

The SRRRI rating is based on historical data which may not be a reliable indication of the future risks and rewards of the Fund. We cannot guarantee that the rating of the Fund will remain the same: it may change over time.

Even the lowest rating 1 does not mean a risk free investment.

On a scale of 1 (less risky) to 7 (more risky), this Fund has a rating of 5 due to its past performance and the nature of its investments. Shares with a rating of 5 might have a higher risk, but also higher returns. Risk is taken in order to make a higher potential return; the more risk a fund takes, the higher the potential return but the greater the risk of loss.

The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may get back significantly less than the original amount invested.

The Fund may also experience the following risks:

Emerging market risk: Emerging markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

For further information on risks, please refer to the Risk Factors section in the Company prospectus.

Investment should be made on the basis of the Prospectus and Key Investor Information Document. If you are in any doubt as to the suitability of any of our funds for your investment needs, please seek independent financial advice.
