Risk and Reward Profile

◀ Lower Risk
Potentially Lower Rewards

Higher Risk ▶
Potentially Higher Rewards

The synthetic risk reward indicator (the SRRRI) rating is not a measure of the risk of you losing your investment but describes how much the value of the Fund went up and down in the past.

The SRRRI rating is based on historical data which may not be a reliable indication of the future risks and rewards of the Fund. We cannot guarantee that the rating of the Fund will remain the same: it may change over time.

Even the lowest rating 1 does not mean a risk free investment.

On a scale of 1 (less risky) to 7 (more risky), this Fund has a rating of 5 due to its past performance and the nature of its investments. Shares with a rating of 5 might have a higher risk, but also higher returns. Risk is taken in order to make a higher potential return; the more risk a fund takes, the higher the potential return but the greater the risk of loss.

The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may get back significantly less than the original amount invested.

The Fund may also experience the following risks:

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund.

Emerging market risk: emerging markets may not provide the same level of investor protection as a developed market; they may involve a higher risk than investing in developed markets.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within five years.

For further information on risks, please refer to the Risk Factors section in the Company prospectus.

Investment should be made on the basis of the Prospectus and Key Investor Information Document. If you are in any doubt as to the suitability of any of our funds for your investment needs, please seek independent financial advice.

Country Classification

The fund aims to invest in companies listed in, incorporated in, or earning the greater part of their revenues or profits in Asia Pacific ex-Japan markets. The Japan exposure shown in the Country Breakdown represents companies that are listed on the Japanese Stock Market, but produce the majority of their revenues or profits in Asia Pacific ex-Japan markets.

Important Information
