

First Sentier Asia Strategic Bond Fund Class I M USD

a subfund of First Sentier Investors Global Umbrella Fund plc (the Company) – Fund Factsheet

30 November 2025

Investment objective and policy

The Fund aims to achieve total return, consisting of both income and capital gains through investment in a diversified portfolio of fixed income and similar transferable instruments issued primarily by government and corporate entities in Asia.

The Fund is actively managed and is not managed against any benchmark, with a flexible approach to the allocation and selection of assets, subject to the investment objective, policy and prospectus terms. Investments are chosen based on a detailed analysis of the macroeconomic environment to determine the allocation to different countries, sectors and overall risk in the Fund. Further analysis is conducted in relation to the selection of each fixed income security taking into consideration the potential for income, growth and capital repayment.

First Sentier Asia Strategic Bond Fund Class I M USD

a subfund of First Sentier Investors Global Umbrella Fund plc (the Company) – Fund Factsheet

30 November 2025

The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may get back significantly less than the original amount invested.

The Fund may experience the following risks:

Emerging market risk: Emerging markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.

Currency risk: The Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Single country / specific region risk: investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

Interest rate risk: bond prices have an inverse relationship with interest rates such that when interest rates rise, bonds may fall in value. Rising interest rates may cause the value of your investment to fall.

Credit risk: the issuers of bonds or similar investments that the Fund buys may get into financial difficulty and may not pay income or repay capital to the Fund when due.

Below investment grade risk: below investment grade debt securities are speculative and involve a greater risk of default and price changes than investment grade debt securities. In periods of general economic difficulty, the market prices of these types of securities may decline significantly.

For further information on risks, please refer to the Risk Factors section in the Company prospectus.

Investment should be made on the basis of the Prospectus and Key Information Document. If you are in any doubt as to the suitability of any of our funds for your investment needs, please seek independent financial advice.
